| quantity of one or more Priority Chemicals currently found in our reduction, recycling, or other materials management practices. In that we believe we can achieve as partners in this program. The v | this enrollment application, we identify one or more voluntary goals |
| GOAL #1. Chemical Name: Naphthalene | CASRN: 91-20-3 |
| Narrative description of proposed project: | |
| | The process requires adding naphthalene-bearing reducing solvents |
| | y the process/equipment and add heat exchangers keeping organic |
| coatings at a constant temperature decreasing the use of reducin | |
| suppliers and will try to influence the removal of naphthalene or | |
| How we will measure success: | |
| All hazardous materials are entered into a database from MSDSs | s by percent by weight. Steelscape will measure success by the |
| reduction of pounds used. | 5 by percent by weight. Steenscape will incusare success by the |
| March, 2010 (month/year). 1b. To accomplish this goal, we will use the following source reduction (month/year). Equipment or technology modifications. | vear) to a reduced amount of 62,825 pounds generated/used by suction options (check all that apply): Process or procedure modifications. Substitution of less toxic raw materials. |
| 2a. In addition to, or in lieu of using source reduction methods, or increase the recycled or recovered quantity of this chemical from (month/year) to an increased quantity of pounds by 2b. To accomplish this recycling or recovery goal, we will use the Direct use/reuse in a process to make a product Processing the waste to recover or regenerate a usable Using/reusing waste as a substitute for a commercial process. | a baseline amount of pounds in y (month/year). e following options (check all that apply): e product. |
| 3. We have a Quality Assurance/Quality Control Plan for data (cl. Please use supplemental sheets for additional goals. | heck which applies). X Yes No |
